3.1 Establishment of Zoning Districts

- A. **Establishment of Zoning Districts:** For the purpose of this Ordinance, the planning jurisdiction subject to this Ordinance is divided into the following zoning districts. Each of the zoning districts stands alone and is not part of a hierarchy-system of zoning. For example, uses permitted in the I2 district are not permitted in the I3 district unless expressly listed as such in the I3 district. Only those uses and standards that are expressly indicated and noted for each district apply to that district.

3.1 Establishment of Zoning Districts (cont.)

- B. **Establishment of Planned Unit Development District:** This Ordinance allows for any zoning district(s) to be rezoned for the creation of a Planned Unit Development. All Planned Unit Developments shall comply with the requirements of Article 5 of this Ordinance.
- C. **Subdivision of Land:** The subdivision of land in every zoning district shall comply with the provisions of the Subdivision Control Ordinance. The subdivision of land in each zoning district shall be limited as specified by the provisions of this Article.

3.2 Land Uses

- A. **Land Uses Specified:** Each land use is either a permitted, prohibited or a conditional use in each zoning district. A list of permitted and conditional use categories for each district is provided in the "Permitted Uses" and "Conditional Uses" columns accompanying the description of each district in this Article. Specific land uses within each category are listed in the Land Use Matrix at the end of this Article.
- B. **Unlisted or Questionable Land Uses:** Any use not listed as a permitted use or conditional use is considered prohibited. The Planning Director may determine into which category any questionable use is placed if it is not specifically listed but is similar to another use that is a permitted or a conditional use. This determination may be appealed to the Board of Zoning Appeals consistent with the provisions of Chapter 12.5 for Appeals of Administrative Decisions.
- C. **Minor Essential Services:** Minor essential services shall be permitted in all zoning districts. These services shall include overhead or underground gas, electrical, telephone, steam, fuel or water transmission or distribution systems; as well as collection, communication, supply or disposal systems, including towers, poles, wires, mains, drains, sewers, pipes, conduits, cables, traffic signals, hydrants and similar items.

3.3 Standards

- A. **Lot Standards Established:** The lot standards for each zoning district shall be as specified in the description of each district in this Article. Lot standards shall include, but not be limited to, front setback, side setback, rear setback, lot area, lot width, lot frontage, lot depth, height, living and ground floor areas, primary structures, and lot coverage.
- B. **General Lot Standards:** All lots shall comply with the following standards consistent with the applicable lot standards:
1. **Compliance Requirements:** Except as provided in this Ordinance, no structure shall be erected, altered, enlarged or reconstructed unless such alteration, enlargement, or reconstruction conforms with the lot regulations of the zoning district in which it is located. The lot standards of this Article may not apply in instances where this Ordinance specifically provides alternate standards, such as an overlay zoning district.
 2. **Setback Standards:** No portion of any structure is allowed to be located within the required setbacks. Structures shall include, but not be limited to garages, carports, decks, and platforms above normal grade level.
 - a. **At-Grade Improvements:** Parking spaces, interior drives, other vehicle use areas and sidewalks shall be permitted within the required setbacks at normal grade level subject to the standards of this Ordinance.
 - b. **Minor Appurtenances:** Cornices, bay windows, chimneys, eaves, and other minor appurtenances to structures may encroach into the required setbacks by a maximum of 2 feet. Steps, awnings, balconies, fire escapes, and other similar features may encroach into the required setbacks by a maximum of 5 feet.
 - c. **Easements:** No building shall be located in any easement required by the Subdivision Control or Zoning Ordinance regulations. Further, no building should be located in any other easement without written permission and/or coordination with the easement holder; the property owner is responsible for compliance with these private agreements.
 3. **Access Requirements:** Every structure and/or use erected, moved, or established shall be located on a lot with the frontage required by the zoning districts described in this Article. Every lot shall have access to a public street or on a private street or access easement. The use of all private streets and access easements shall be subject to the approval of the Plan Commission, consistent with all applicable requirements of this Ordinance and the Subdivision Control Ordinance.
- C. **Lot Standards Measurement:** The measurement and calculation of the lot standards established by this Article shall be as described below. All figures shall be rounded to the nearest whole number. All

fractions of 1/2 or greater and all percentages of 0.5% or greater shall be rounded up to the next highest whole number.

1. **Gross Density:** Gross density shall be measured as the number of dwelling units per acre in a given area, including any property used for street rights-of-way, parks, open space, flood hazard areas, or other features.
2. **Lot Area:** Lot area shall be measured as the horizontal area included within the exterior lines of a lot, including any easements and required setback or buffer areas, but excluding any rights-of-way or similar dedications to the public.
3. **Lot Width:** Lot width shall be measured as the horizontal distance between side lot lines at the front setback line or build-to line affecting the property. The front setback line for irregularly shaped lots may exceed the minimum required and therefore represent the lot width that is provided.
4. **Lot Frontage:** Lot frontage shall be measured as the horizontal distance between side lot lines measured at the point at which the lot abuts a right-of-way or other access. Lot frontage and/or access on a public right-of-way, private right-of-way, or easement shall be consistent with the requirements of the Subdivision Control Ordinance and shall be subject to Plan Commission approval through the platting process, if applicable.
5. **Lot Coverage:** Lot coverage shall be measured as the percentage of the lot area occupied by permanent primary and accessory structures. Lot coverage shall not include area occupied by temporary structures, parking areas, sidewalks, or other similar paved surfaces.
6. **Front Setback:** Front setback shall be measured as the shortest horizontal distance between the street or road right-of-way specified by the applicable Thoroughfare Plan and the foundation of the nearest structure. Front setback requirements shall also apply to any reserved rights-of-way. The specified right-of-way shall be measured with 1/2 of the required distance on either side of the centerline of the street/road. In locations where the actual right-of-way exceeds the Thoroughfare Plan specified right-of-way, the front yard setback shall be either (1) as specified for each zoning district by this Article and measured as described above, or (2) 5 feet from the actual right-of-way, whichever is greater.
 - a. **Multiple Frontage Lots:** All lots with more than one frontage on a street or road (such as corner lots and through lots) shall be considered as requiring a front setback for each street/road frontage. The minimum side setback shall be required for all other yards.
 - b. **Cul-de-Sac Lots:** The measurement of front yard setback on a cul-de-sac shall be expressed as an arc which parallels the right-of-way.

Front Setback (Figure 3.3)

7. Front Built-to Line: Built-to line shall be measured as the shortest horizontal distance between the front lot line and the foundation of the nearest structure.
8. Rear Setback: Rear setback shall be measured as the shortest horizontal distance between the rear lot line and the foundation of the nearest structure.
9. Side Setback: Side setback shall be measured as the shortest horizontal distance between a side lot line and the foundation of the nearest structure. When expressed as an "aggregate" the measurement shall be a total for both sides of the lot. In all other cases the setback shall be measured for each side yard.
10. Living Area: Living area shall be measured as the floor area of a dwelling intended for human occupation and use. The measurement of living area shall exclude any garage, unfinished basement, or other similar space.

3.3 Standards (cont.)

Side Setback (Figure 3.4)

11. Ground Floor Living Area: Ground floor living area shall be measured as the percentage of total living area located on the ground floor of a dwelling.
13. Primary Structures per Lot: Primary structures per lot shall be measured as the total number of primary structures and/or separate structures housing different primary uses on any lot.
14. Height: Height shall be measured consistent with Chapter 9.1.

3.3 Standards (cont.)

- D. **Development Standards:** All structures and land uses, including any alterations to either, that are established or otherwise occur after the effective date of this Ordinance shall conform to the development standards provided by this Ordinance. The development standards that apply to each zoning district shall be as cross-referenced in the description of each district in this Article and as otherwise described by this Ordinance. The development standards shall not apply in instances where this Ordinance specifically provides alternate requirements, such as an overlay zoning district.

District Intent:

The "AV", Agriculture, Voluntary Protection zoning district is intended to provide a mechanism for owners of agricultural property to voluntarily limit the possible development of their land. In no instance shall any property be zoned "AV" without the consent of all property owners.

The "AV" zoning district does not provide any automatic tax incentives for agricultural uses. Further, this zoning district does not prevent future rezoning of the property for non-agricultural purposes. The "AV" zoning district provides property owners with a method of officially signaling their intent to allow only low intensity, agriculture-related development on their property at the current time.

3.5 Agriculture: Preferred (AP)

Zoning Districts

District Intent:

The "AP", Agriculture, Preferred zoning district is intended to provide an area suitable for agriculture and agriculture-related uses. This district is further intended to preserve the viability of agricultural operations, and limit non-agricultural development in areas with minimal, incompatible infrastructure.

Residential development in this zoning district is intended to be limited. In no instance shall this zoning district be considered a large-lot residential zone. This district is further intended to protect the use and value of both agricultural and non-agricultural property with the community.

District Intent:

The "AG", Agriculture, General Rural zoning district is intended to provide areas for a mixture of agricultural and residential land uses. This mixture is intended to support the long-term viability of agricultural operations, while also allowing increased non-agricultural development in areas adjacent to developed infrastructure. This district should be used to provide unique, rural housing options and the future ability to extend urban infrastructure.

District Intent:

The "RR", Residential, Rural zoning district is specifically intended to (1) provide for the development of new residential neighborhoods on select properties in otherwise rural and/or agricultural areas of the jurisdiction of Bartholomew County and (2) to provide an option for the regulation of lake communities and other existing rural developments in both Bartholomew County and Columbus jurisdictions.

In the case of new development in Bartholomew County this zoning district is intended to be applied to properties upon the request of the property owner or developer in anticipation of a future subdivision. The RR district should only be applied in instances where it can be demonstrated that (1) the property is not prime agricultural ground and/or not suited to agricultural uses, (2) the property is adequately served by public streets or roads, and (3) the property is either provided with public sewer and water utility service or can adequately accommodate well and septic systems.

District Intent:

The "RM", Residential, Multi-Family zoning district is intended to provide areas for a variety of multi-family uses, such as two-family dwellings, apartment homes and complexes, and condominiums in areas with compatible infrastructure and services. Development in this zoning district should be served by sewer and water utilities. This district should be used in limited locations with highly developed infrastructure, immediate access to Arterial or Collector roads, and direct connections to public open space and convenience goods. This district may be used to provide a transition from regional commercial areas to moderate density single-family residences.

In the jurisdiction of the City of Columbus this district is intended for use only within the City limits.

In the jurisdiction of Bartholomew County and the Edinburgh / Bartholomew / Columbus Joint District Plan Commission this district is intended for use only in coordination with concentrations of other comparatively high density development where services can efficiently be provided.

Zoning Districts

District Intent:

The "CN", Commercial, Neighborhood zoning district is intended to provide convenience goods, services, and amenities within close proximity to residential areas. This district is also intended to enable the development of small-scale, mixed-use neighborhood centers. The commercial centers are generally to be located at major intersections, should be pedestrian oriented, and should provide ample buffering from adjacent residential uses. Further, this district should be protected from non-neighborhood serving land uses and businesses.

In the jurisdiction of the City of Columbus this district is intended for use only within the City limits.

In the jurisdiction of Bartholomew County and the Edinburgh / Bartholomew / Columbus Joint District Plan Commission this district is intended for use only in coordination with concentrations of other comparatively high density development where services can efficiently be provided.

District Intent:

The "CR", Commercial, Regional zoning district is intended to establish appropriate locations for a variety of businesses that either (1) serve a regional market or (2) require convenient access to high-volume transportation routes. This district should be limited to locations with access and infrastructure which is compatible with the needs of regional-serving businesses and facilities. This district should be focused at key intersections, rather than extended along corridors.

In the jurisdiction of the City of Columbus this district is intended for use only within the City limits.

In the jurisdiction of Bartholomew County and the Edinburgh / Bartholomew / Columbus Joint District Plan Commission this district is intended for use only in coordination with concentrations of other comparatively high density development where services can efficiently be provided.

District Intent:

The "P", Public / Semi-Public Facilities zoning district is established as a Site Development Plan district consistent with the IC 36-7-4-1400 series and Chapter 12.8 of this Ordinance

The "P", Public / Semi-Public Facilities zoning district is intended to provide locations for large-scale public facilities, worship facilities, and concentrations of other public institutions. This district should not be applied to single properties as a "spot" zone, but rather in those locations where a single large facility or combination of facilities forms an institutional center. This district is further intended to provide a set of setbacks and other requirement that respond to the unique scale and other considerations common to these types of uses. This district should be applied to reduce land use conflicts and ensure that public and semi-public facilities are appropriately integrated into the community.

Amendment(s):

Section 3.21(C) revised per City Ord. 5, 2009 (2.17.09) & County Ord. 2, 2009 (3.2.09).
